

To whom it may concern,

As a subscriber and ardent fan of XM radio I am extremely pleased with the service that XM radio provides .When I read that the NAB is upset that XM is offering weather and traffic info I can only wonder what the problem is .Let's face facts I pay money to XM and pay it gladly because the service provides me with what I am looking for in radio .Old fashioned radio is mostly endless commercials and lame disc jockeys .XM is honestly competing here for the listeners by providing a better service than old fashioned radio .Maybe when old fashioned radio stops bombarding me with commercials and worthless chatter from disc jockeys I might tune back in .As far as the debate over XM radio offering weather and traffic goes all I can say is GET OVER IT ALREADY !!!! You bums in the NAB need to get a clue and possibly a few XM receivers so you can get a better picture of what radio is really all about instead of trying to protect your little bit of airwave turf .

In all honesty telling XM radio it cannot provide weather or traffic info is like telling old fashioned radio it may not broadcast music of any sort .But I noticed here that nobody is telling old fashioned radio that ,so maybe old fashioned radio needs to shut up ,sit down and pay attention as the competition is very very good and old fashioned radio is .....not so good !!

This is America people not some communist country .So if you cannot compete then do the world a favor and turn it off and let real competitors have the frequency .

God Bless America!

Sincerely ,Jens Heydel
